Company Description:

We're AT&T. Maybe you've heard of us. As the first truly modern media company, AT&T has been changing the way people live, work and play for the past 144 years. It started with Alexander Graham Bell's telephone. Since then, our legacy of innovation has included the invention of the transistor – the building block of today's digital world – as well as the solar cell, the communications satellite and machine learning.

Throughout its history, AT&T has reinvented itself time and time again – most recently adding WarnerMedia to reshape the world of technology, media and telecommunications. Our two companies are no strangers to making history together. In the 1920s, AT&T built the technology to add sound to motion pictures, which Warner Bros. then used to create the first talking picture.

For nearly 100 years, WarnerMedia and its family of companies have redefined how audiences around the world consume media and entertainment. It launched the first premium network in HBO and introduced the world's first 24-hour all-news network in CNN. WarnerMedia continues to deliver popular content to global audiences from a diverse array of talented storytellers and journalists.

Here's where you'll help us do what we do best: connecting the world through the latest tech, top-of-the line communications and the best in entertainment. Sound interesting? Good. So what kind of difference do you want to make? Cause we think big around here.

Discover how we take care of your biggest needs: We take care of our own here (hint: that could be you). Our benefits and rewards mean we cover some of your biggest needs with some of the coolest offerings. We already think we're a pretty great place to work. We're just trying to rack up some bonus points.

What gets us powered up each day? Doing incredible things & living our values: Working here is more than just a job title. It's about sharing in something greater, doing incredible things and living out our values. No matter who you are, you'll find endless ways to be a part of it.
